EDUCATION

Bachelor of Science in Computer Science

Karachi, Sindh | Aug 2023 - Jun 2027

National University of Computer and Emerging Sciences (FAST, NUCES)

- CGPA: 3.67
- Relevant Courses: Recommender Systems, Deep Learning & Perception, Artificial Intelligence, Data Structures, Database Systems, Software Engineering, Probability & Statistics, Linear Algebra

WORK EXPERIENCE

Management Information Systems (MIS) Intern

Karachi, Sindh | Jul 2025 - Oct 2025

Vconn Private Limited

- Built NLP & ML models with Python and FastAPI to automate resume analysis on a large dataset.
- Developed full-stack apps using MERN, .NET (C#), and Vue.js with improved UI/UX.
- Integrated 10+ REST APIs and managed SQL Server data for scalable, high-performance applications.

PROJECTS / OPEN SOURCE

Multi-Channel Customer Churn & Retention System | [GitHub](#)

- Built an end-to-end churn platform for 5,000 customers using XGBoost & Cox Proportional Hazards to predict at-risk users and revenue impact.
- Created an interactive React dashboard to track RFM segments, survival probabilities, and model metrics.
- Automated ML pipelines and deployment with Airflow, MLflow, and Docker for reproducible workflows.
- **Technologies:** Python, FastAPI, React, PostgreSQL, XGBoost, Lifelines, MLflow, Airflow, Docker, Pandas, NumPy

NetOps - AI-Intelligent Network Management System | [GitHub](#)

- Built an intelligent network monitoring platform processing 10,000+ logs using NLP & ML (Random Forest, SVC, Linear Regression), automating alert classification and saving 20–30 hours/week.
- Developed a ChatOps assistant with 50+ real-time commands, integrated with Flask REST API, automating analytics and improving monitoring accuracy and efficiency.
- **Technologies:** Python, React, Flask, NumPy, Matplotlib, Scikit-learn, SpaCy, Git

SteamUp! - Game Recommendation System | [GitHub](#)

- Built a game recommendation system for 10,000+ games using knowledge + content-based filtering.
- Implemented 4 similarity metrics + constraints, improving recommendation accuracy by 25%.
- Developed a full-stack FastAPI + React platform handling real-time queries and user preferences.
- **Technologies:** Python, React, MongoDB, FASTAPI, Scikit-learn, JavaScript, Git

Pharmora – Full Stack Pharmacy Web Application | [GitHub](#)

- Built a full-stack pharmacy platform with role-based dashboards for Patients, Doctors, Pharmacists, Suppliers, and Admins, implementing secure authentication and interactive UI to improve workflow.
- Integrated REST APIs for 100+ medicines for real-time updates and automated orders.
- **Technologies:** PERN (PostgreSQL, Express.js, React, Node.js), Supabase, Vite, Tailwind CSS, Git

SKILLS

Programming Languages

C++, C#, Python, JavaScript, TypeScript, SQL

Web Technologies

Node.js, Express.js, React, Next.js, Vue.js, .NET, Tailwind CSS, FastAPI, Flask

Databases & Data Tools

MongoDB, SQL Server, PostgreSQL, Supabase, Power BI

Python Libraries/ Frameworks

NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, XGBoost, spaCy

Tools & Platforms

Docker, Apache Airflow, MLflow, Git, GitHub, Postman

ADDITIONAL

- **Certifications:** IBM Data Science Professional Certificate | [Verify](#), Machine Learning Specialization, Stanford University | [Verify](#), Google AI Essentials | [Verify](#)
- **Honours & Awards:** Dean's List Fall 2023, Spring 2024, Fall 2024, Fall 2025
- **Leadership:** CS Competitions Co-Head, PROCOM'26, FAST University - Led 9 modules and a 100+ member team, managing frontend development, graphics, UI/UX, and event organization for 1000+ participants.
